

## INSTRUCTIONS FOR THE INSTALLATION OF DOWCO® PVC MOTORCYCLE STORAGE COVER

Congratulations on your purchase of a DOWCO Inc. motorcycle cover. The PVC storage cover is manufactured from 100% PVC vinyl and is intended for indoor or outdoor storage. Your cover is 100% waterproof and includes grommets in the hem to facilitate the use of a locking device. This feature keeps the cover tight around the wheels. The following information should be used to ensure maximum longevity.

**Note:** All DOWCO Inc. covers are sized to fit specific motorcycles. It is very important that you have the correct one for your application. If you are uncertain as to what size PVC cover you need, please contact your dealer or DOWCO Inc. to verify your fit before attempting first-time use.

**Note:** *This cover is not designed for covering your motorcycle while it is being trailered or in the back of a pick-up truck.*

### **WARNING**

*This cover must be completely removed prior to starting or operating the vehicle. Failure to do so could result in serious injury and/or property damage.*

#### Installation

Read instructions before using.

Unfold cover. Locate "BACK" tag.

Starting in the front wheel area, pull down over the windshield and over the centerline of the wheel.

Working rearward, slide the cover down the sides, avoiding "snag" points. Care should also be taken to avoid placing the material against hot engine components, as burning or melting may occur.

**Caution:** Mirrors, muffler ends, shifters, brakes and foot pegs are common wear points. Do not allow fabric to "snag" around them. Antennas are capable of puncturing the cover – use extreme care.

#### Important

Wait for the motorcycle to cool-down before installing the cover. This will greatly increase the life of your cover. Grommet patches are provided to enable you to secure the cover under the motorcycle.

#### Care and Cleaning

Your cover requires very little maintenance. Normal dirt and grime should be brushed off with a soft terry cloth or removed with warm water and a mild detergent using a sponge or terry cloth.

**Caution:** Do not place in washing machine and do not wring or twist the cover to remove moisture.

The fabric may fade in direct sunlight after continuous use. This is normal wear.

#### Important

Failure to comply with the above directions may reduce the life of your cover. If you have any questions or comments, please contact either your dealer or DOWCO Inc.
